FIVE REASONS Why You Should Buy Your Nursery Stock Direct By Mail From KRIDERS

1—IT'S EASY TO ORDER BY MAIL

Everyone shares in the pleasure and excitement that comes in shopping from your mail order nursery catalog. In these days of hypertension here, surely, is one wholesome soul-satisfying activity the whole family can share as a group. Here you have time to plan wisely, to be sure you buy the things you really want.

2—LIKE A DEPARTMENT STORE IN YOUR HOME

When you order from KRIDER'S you have the widest possible choice of items. No retail store could afford to offer so many selections because they can carry profitably only the most popular, fastest moving varieties.

3—YOU DON'T GET ANY WRONG ANSWERS FROM KRIDER'S CATALOG.

Careful, accurate labeling of varieties is highly important to you. Probably no one intentionally mislabels nursery stock these days—a favorite trick of unscrupulous door-to-door peddlers in years gone by—but mistakes can happen in any era. To protect you against error your nurseryman serves you by providing

periodic inspection of young plants, conducted by experts with years of training and experience in plant identification.

4—BUY YOUR NURSERY STOCK FROM EXPERTS

Scientific packaging and shipping techniques have been developed in cooperation with university and industrial laboratories. These techniques, taking full advantage of new materials and processes, have been so successful that experimental shipments have been made completely around the world, with the stock arriving in good condition.

5—DELIVERED TO YOUR DOOR

It's a thrilling moment when your package of nursery stock arrives. Here is no casual collection of sticks and twigs. This bundle represents years of study, by a countless number of dedicated men, men who find reward not only in the money you pay them, but in the satisfying knowledge that they are helping you to realize the dream of making your own part of the world a better and more beautiful place to live.

GIFTS FOR EARLY ORDERING

YOU MAY SELECT \$2.00 WORTH OF STOCK FROM THIS BOOK WITHOUT CHARGE WITH AN ORDER AMOUNTING TO \$10.00 OR OVER AND SENT TO US BEFORE MARCH 15

PLEASE NOTE

The earlier you get your order in to us the better. This enables us to take care of the necessary clerical work on orders during the winter before the rush of the spring shipping season. This amounts to a saving with us and we are glad to show our appreciation by allowing you to select GIFTS.

Remember these gifts apply only to cash orders of \$10.00 or over, and your order must be post-marked March 15th or before. Gift stock must be listed and sent in with your original order as it is impossible for us to hunt out orders and attach lists of gift stock after orders are filed for shipping. The premiums are given for early orders and those coming in when the shipping season has opened cannot be classified as early orders. Gift stock may be selected from any items in this book.

TERMS—CASH WITH ORDER

Always Keep a Copy of Your Order for Checking When Plants Arrive

WE PAY SHIPPING CHARGES ON MOST ITEMS IN THIS BOOK AND THEY ARE SO MARKED

Please note that most items in this book are sent to you prepaid. A considerable saving is yours when you order from us. Compare our prepaid prices with those who ship not prepaid and you will readily see the saving to you. Shade trees, and some ornamental trees which make packages too large to come under parcel post size limits will be sent by express and you pay your agent the actual shipping charges on arrival. We try to price such items low enough to practically absorb the charges you may pay. In certain orders where some items are prepaid articles and some may be trees or items which necessitate express shipments we will send the entire order by express rather than make two shipments. For this privilege we will add an extra item to reimburse you for any charges you may pay on the prepaid items included.

We are proud to display the "Shield of Quality" symbol of the National Mail Order Nurserymen's Association. You can buy with confidence where you see this shield.

Krider's GUARANTEE

We guarantee that each plant shall be true-to-name, otherwise we will replace free of charge or refund purchase price of any proven not to be so. We guarantee that each plant shall be of a size and quality as described in this catalog, and that plants will reach the customer in good condition.

Upon arrival, examine your stock and if not entirely satisfied, return at once and we will replace free or refund your money. Remember, a plant is a living thing, it feeds, drinks and breathes, and is subject to attacks by insects, disease and drought; hence we do not guarantee growth after planting. Stock lost after planting due to conditions beyond our control will be replaced at cost of postage, packing and handling charges in getting the stock to you, provided we are notified by July 15th, 1958. We are willing to give you the stock if you are willing to pay the handling costs in getting it to you. In no case will we be liable for more than the original purchase price of the stock.

4 FLORIBUNDAS for Color

DEPENDABLE, HARDY, FREE BLOOMING, VERSATILE

WHAT ARE FLORIBUNDAS?

Floribundas are an entirely different and distinct group of Roses. They are extremely hardy, doing well under the most adverse conditions. They are the most prolific of bloomers. Floribundas start blooming very early in June and continue to produce constantly until freezing weather. Their blooms are like the Hybrid Teas in form. They grow vigorously with canes from 20 to 30 inches in height. Floribundas are one of the best plants we know of for bedding and for borders. Their foliage is attractive and not easily subject to disease, and their constant blooming habit makes them desirable wherever a long and colorful flowering season is needed.

3434 NEW "MORaine" LOCUST

Plant Patent No. 836

AMERICA'S GREAT NEW SHADE TREE

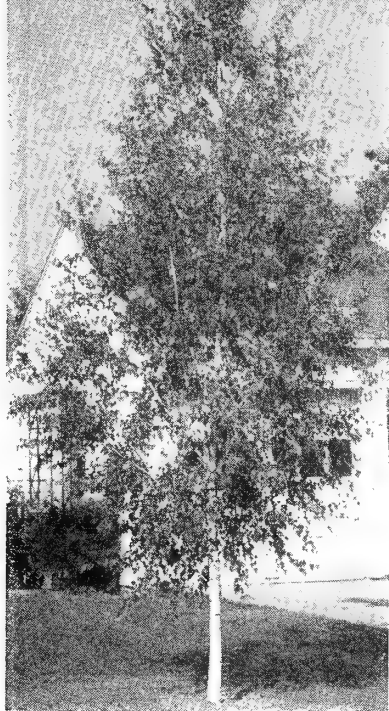

Developed and introduced by Siebenthaler Company of Dayton, Ohio. The perfect answer to the demand for a clean, fast-growing, long-lived shade tree.

The MORaine LOCUST is a round headed tree when young but tall and vase-shaped when older. Mature trees attain a height of 80 to 100 feet with lower branches high enough to clear a two-story house. This feature permits planting the tree closer to the house than is the case with most other trees. Leaflets are small and in the fall they drift in between the grass blades on the lawn making very little raking or clean up. Very little pruning is needed as the lower limbs self prune as the tree grows. Tests show this new tree to grow more rapidly than either Silver Maple or Chinese Elm. It withstands drought and heat and cold. Thrives under adverse city conditions as well as on the plains where rainfall is slight. Excellent for either lawn or street planting. One of the best new tree introductions for American homes.

TWELVE OF THE WORLD'S FINEST VARIETIES OF HARDY PERENNIAL PHLOX

DO NOT ALLOW YOUR PHLOX TO GO TO SEED—This is Very Important

Keep blooms cut as they fade. If you permit plants to go to seed they will drop hundreds of seeds right around the base of the plant. Next year masses of seedlings will spring up. These usually have the old magenta color and soon kill out your true variety. This soon makes the bed a mass of seedlings.

ALMOST EVERGREEN**

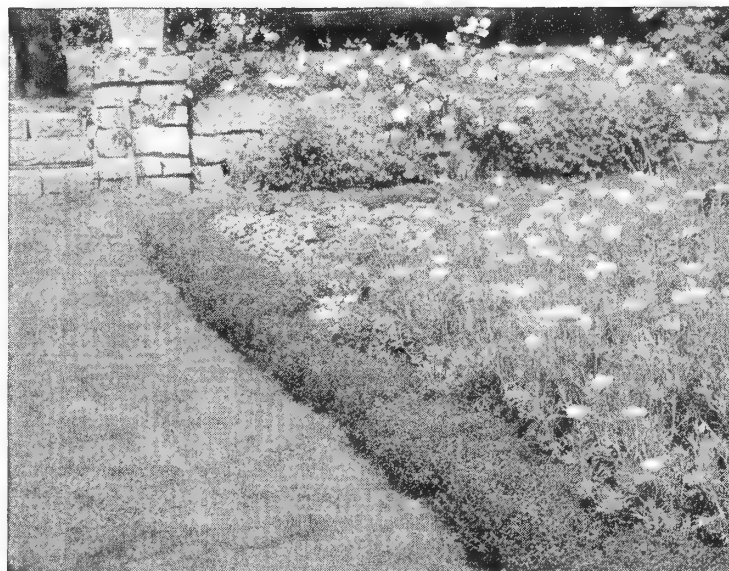

One of the loveliest of the semi-dwarf plants. Foliage is almost evergreen, remaining green until almost New Years. Each spring the plant is covered so densely with white, snow-flake-shaped blooms that it really resembles a small mound of snow. Very hardy, easily grown and requires only average garden soil. Reaches only about 12 inches in height, which makes it invaluable for the foreground in perennial beds or for low borders.

**Nice 2-Yr. Plants, 40c Each; 4 for \$1.50;
10 for \$3.50; 25 for \$6.50, postpaid.**

4182 SAPONARIA

**VINE-LIKE PERENNIAL FOR TRAILING OVER WALLS
AND TERRACES—FINE FOR ROCKERY—Not Pictured**

We like this the best of all the trailing plants. One main root but it throws out numerous tendril-like branches close to the ground. Foliage is a bright green all season and in spring the plant bears small bright pink blooms in abundance. An excellent plant to plant along the top of a wall where the trailing branches can hang over. **2-yr. field-grown plants, 40c each; 4 for \$1.25; 12 for \$3.00, postpaid.**

Free Blooming Iris Shilka

4134 "POOR MAN'S ORCHID"

IRIS SHILKA

Many years ago as a crowded, uncomfortable train puffed its way across the endless barren plains of Siberia, Prof. Hansen, an American passenger, was electrified by the sight of patches of what appeared to be Orchids blooming in that desolate region, near the small town of Shilka. As the train stopped at the station, Prof. Hansen left it to satisfy his curiosity. When he made a closer inspection of the plants he found them to be of the Iris family, but their form and color so closely resembled the Orchid that he immediately thought of the descriptive phrase, "Poor Man's Orchid." He secured several of the plants and brought them home to America with him. Several years of propagation and development showed them to be perfectly adapted to our climate and they were placed on the market under the name of **Iris Shilka**, recalling the name of the Siberian town where they were first found. **We offer nice field-grown plants, blooming size.**

5202 PFITZER JUNIPER

The well known, gracefully spreading, low-growing evergreen with sweeping fronds of fresh green foliage. Very hardy and does well in sun or shade. Quite rapid in growth when once established. (See next page for other evergreens which do well in shade.) 12- to 15-inch spread, \$2.35 each; 2 for \$4.50, prepaid.

5205 SILVER-BLUE PFITZER JUNIPER

Well rooted, 15- to 18-in. trees, \$2.00 each; 2 for \$3.75, prepaid.

Colorado Blue Spruce

5208 COLORADO BLUE SPRUCE

One of the hardiest and most beautiful of all evergreens for specimen planting. Should have plenty of room to develop its branches and stately form. Since Colorado Blue Spruce are grown from seed there is some variation in the blue shading, especially when the trees are young. Should be planted where they have plenty of sunshine to get best color effect. Very young trees are not particularly shapely but the typical symmetrical form comes as the plants grow to 3 feet or more in height. Due to scarcity of Blue Spruce, we can offer only 4-year, heavy transplants, 8-12 in., stocky plants at \$1.50 each; 2 for \$2.75, postpaid. Buy several of them at this low price.

Krider's Ten Commandments On Rose Growing

- 1st. Location.** Rose bed should be in a sunny location and the soil should be of good garden grade and well drained.
- 2nd. Care Before Planting.** Unpack and plant Roses as soon as received from the nursery. If you cannot plant at once, heel them in the ground until ready to plant.
- 3rd. Planting.** In planting, set the plants with the bud, or joint, just above the roots, about 1 1/2 inches below the surface of the soil. Have holes large enough to avoid crowding of the roots. Tramp soil firmly as the hole is filled and leave a slight depression around each plant to retain water. Allow 18 to 24 inches between plants when figuring the number of plants needed for a bed.
- 4th. Care After Planting.** If some plants appear dead and refuse to leaf out within a reasonable length of time after planting, try covering them with a piece of wet burlap. Soak the burlap with water two or three times daily. This will make most of them start leafing very soon. Try it, and you will be amazed at the results.
- 5th. Pruning.** As soon as planting is completed see that all plants and the soil around them is thoroughly soaked with water. Cut back all canes to a length of 4 to 5 inches at planting time. This is very important as the root system of a newly transplanted Rose bush will not be able to leaf the canes to their entire length and many times plants will simply die in trying to do so.
- 6th. Fertilizing.** Keep the Rose planting well watered at all times when there is no natural rainfall. Application of fertilizer during the summer months, 30 days between applications, will induce growth and quality in blooms. We recommend RA-PID-GRO.
- 7th. Cultivation.** Frequent cultivation after planting will maintain a dust mulch on top of the soil which will conserve moisture and continue growth.
- 8th. Spraying.** For leaf spot and aphid, apply Krider's Multi-Purpose Spray or Dust. Apply every two weeks or as often as needed. For slug or leaf eating worms apply arsenate of lead.
- 9th. Watering.** Don't sprinkle beds—wet them thoroughly. If a hose is used, remove the nozzle and let the water soak into the ground until it is saturated.
- 10th. Preparation of Soil.** Any soil that will grow good potatoes or garden plants will grow good Roses. It is not necessary that the Rose bed be entirely of clay soil. Good thoroughly enriched gravel or loam soil will grow as good Roses as clay. Ground should be spaded and well worked.

RA-PID-GRO

MAKES A COMPLETE, QUICKLY AVAILABLE, EASILY PREPARED PLANT FOOD BY MERELY ADDING PROPER AMOUNT OF WATER. CLEAN TO HANDLE, EASY TO USE, PRODUCES PHENOMENAL RESULTS.

All gardeners should try Ra-Pid-Gro because it is so beneficial to plant growth. A clean odorless concentrated dry fertilizer instantly soluble in water. Use when planting. Plants recover from shock, grow more thrifty and less plants die. Simply put 4 teaspoonfuls of Ra-Pid-Gro in 1 gallon of water. Soak the roots of roses, shrubs, and trees 4 to 5 minutes; dip perennial roots, small fruits, bulbs, etc. Pour remaining plant food around plants. Use every 2 or 3 weeks throughout growing season on everything in your garden.

Plants are LIQUID FEEDERS. Ra-Pid-Gro feeds through leaves as well as roots. 1 pound makes 22 gallons of high-power, quick acting, long lasting fertilizer that will not burn if applied according to directions.

HOW MUCH WILL I NEED?

Figure at the rate of 1 lb. of Ra-Pid-Gro for each 100 lbs. of other fertilizer you have been using. Or the manufacturer recommends the following: for a lot 40x60 ft. with 15 shrubs, 20 feet of hedge, 3 fruit trees, 2 evergreens, 12 roses and 800 sq. ft. of lawn, 5 lbs. of Ra-Pid-Gro for a season's feeding.

"BOUNTIFUL"

U. S. Plant Patent No. 1198

A remarkable new Hybrid Bleeding Heart which resembles the old-fashioned Dicentra Eximia but is superior in every way. This sensational plant will form a clump 18 inches in diameter from which flower stems 18 inches tall will arise. As many as 40 stems will appear on an established 2-year plant. Flowers are twice the size of the regular Plumy Bleeding Heart, and are borne over a long spring season, even up into July. Scattered blooms come through the summer and then in early fall another heavy crop of blooms appear. Needs only ordinary well drained soil and a sunny location to show its rich garnet-red color to the best advantage. **Nice, heavy roots for bloom this year, \$1.25 each; 3 for \$3.35, postpaid.**

A large, detailed black and white photograph of a rose, showing its intricate petal structure and deep shadows. The rose is the central focus, with its petals tightly curled in the center and more loosely arranged towards the edges. The lighting creates strong contrasts between the dark, shadowed areas of the petals and the lighter, highlighted sections, emphasizing the texture and form of the flower. The background is dark and out of focus, making the rose stand out prominently.
